  1               5                   10
```

Please explain "<213> Artificial Sequence" in a <220>-<223> section: please give the source of the genetic material.

(also from Sequence 10)
```
<220>
<221> misc_feature
<222> (1)
<223> Xaa = any amino acid from 0 to 2
```

The above <223> response regarding the Xaa at location 1 is invalid: Xaa can only represent a single amino acid; please show the maximum number of Xaa's in the sequence, change the <211> response to include the additional Xaa's, change the <222> response to include the revised locations, and explain in the <223> response that Xaa = any amino acid, and can be from 0 to 2 amino acids. Same regarding the Xaa at location 12.
